FOR IMMEDIATE RELEASE  
February 15, 2017

## SYNERGY FIBER SERVICES COUNTRY'S LARGEST EVER SINGLE-PHASE STUDENT HOUSING PROJECT

February 15, 2017—Synergy Fiber has been selected as the total technology partner for Servitas' development Park West in College Station, Texas. Park West is located on Texas A&M University System's land leased to the National Campus Community Development Corporation, the non-profit owner of the project. At 47 acres, 15 buildings, 2.2 million square feet and 3,406 beds, the development requires an industry-targeted, managed service provider. The country's largest ever single-phase student housing project was awarded to Synergy Fiber, established in 1998, because of their experience in the industry and impressive portfolio of managed properties.

*"Our proprietary, industry-leading network has the physical infrastructure required to deliver tomorrow's communication services today," Synergy Fiber CEO Norman Roe said.*

*"Our representatives at Synergy are the same people we have worked with from the start of our relationship and you just don't see that kind of consistency very often in IT. All of this has positioned Synergy as one of the most reputable companies in the country that caters to the MDU market," Servitas Vice President and Director of Market Research Trey Verbick said.*

Park West requires an army of construction workers to stay on schedule for its August 2017 completion. Synergy Fiber makes up a small but important portion of the nearly 1,000 workers that report to the massive Park West site daily. Synergy Fiber is involved in the construction phase of the project as the low voltage cabling infrastructure provider.

*"Having a technology partner on site throughout the life of the project can have a huge impact to the success of the project," Synergy Fiber Director of Contracting Jamie Cooper said.*

In addition to low voltage cabling, Synergy Fiber is providing the equipment, wiring and service for a host of technology items at Park West including delivery of Ethernet, wireless, television, security and access control. They will continue to provide support to staff and residents of Park West upon building turn-up in August 2017.

*“Working with the professionals at Servitas has been a wonderful experience for us. Their devotion to and understanding of their clients—colleges, universities and their students—is refreshing and makes delivering our product and service that much more rewarding,” Synergy Fiber COO Jenean Kaiser said.*
